

# **Project work: Create a programme for a thalassotherapy workshop**

## **Introduction**

Traditional salt harvesting is still alive in the Sečovlje and Piran salt-pans on the Slovenian coast. It is important cultural heritage but it also provides work and jobs for people living in the region. However, we do not have only salt workers in mind as salt can be used for other products as well. Sečovlje Salina Nature Parks in cooperation with Thalasso spa at Piran salt-pans has expanded their offer of products and activities which represent an important economic impact on the local population.

## **Aim**

The idea is to learn more about different traditions and the importance of them nowadays; observing old traditions in Slovenia and your country and find differences and/or similarities. To enrich the vocabulary, develop the language skills - reading, speaking and presentation skills in particular.

## **Task**

Work in pairs or small groups of 3-4 people. Each pair or group finds information on different activities offered by Sečovlje Salina Nature Park and Thalasso spa; then prepare a one-day workshop with a programme and explain why it is worth attending.

## **Include the following information in your programme:**

- Location and description of the Thalasso spa Lepa Vida
- Offer of spa activities: services and programmes
- Testing one of the services for participants of workshop – make a choice and explain your decision
- Interesting facts you like to add

## **Conclusion**

You did extensive research and learned about the intangible cultural heritage of Slovenia and why it is still important today. You experienced the advantages and disadvantages of working together and you had to make common decisions. The task completed gave you an insight of traditional salt production and activities of it in Slovenia.

**1. Prepare a workshop and present it to other students in the class.**
