If all your information is correct, you will be sent a verification email to the address you provided. Be patient, it can take a couple of minutes.

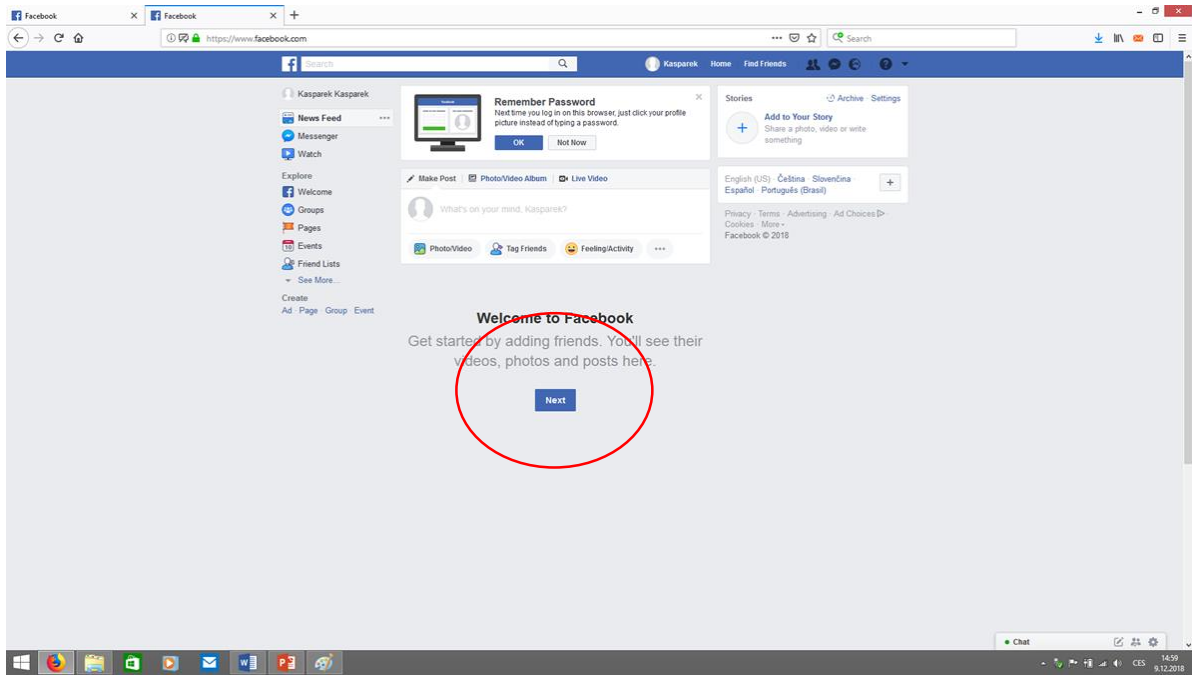

## Step Four

Open the verification email and click on the link provided in the email to activate your account.

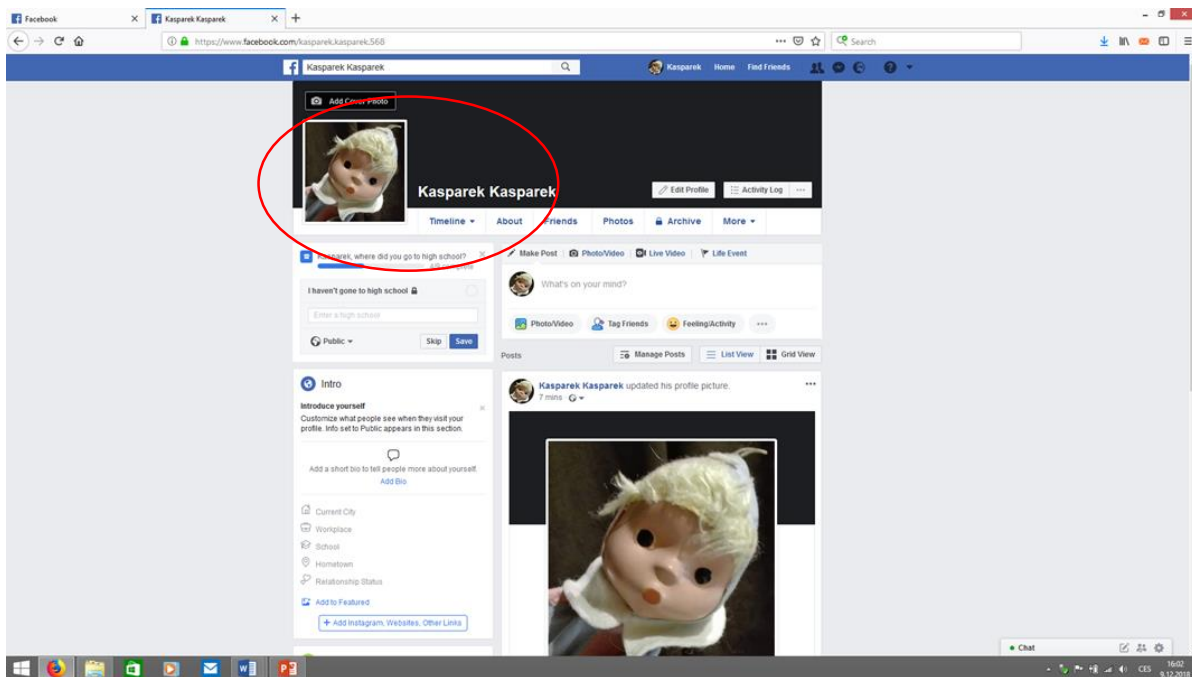

## Step Five

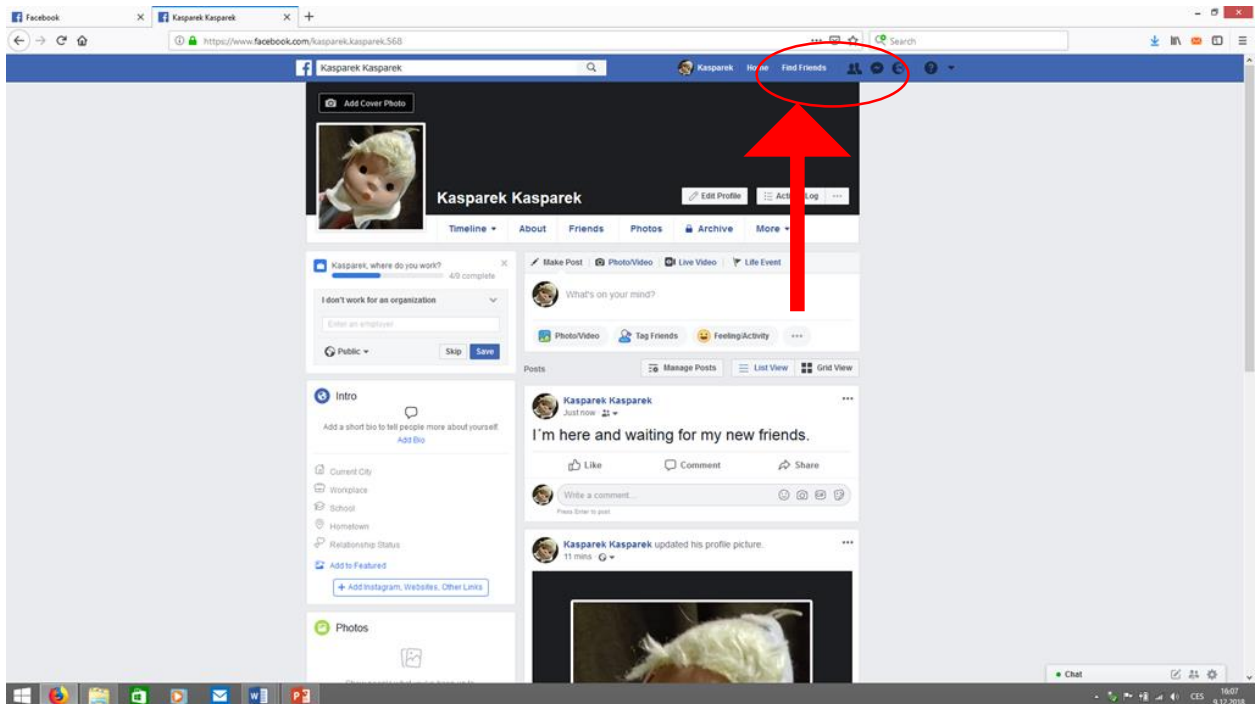

Setting up your profile

1) Add cover photo and profile picture. The first thing you should do after creating an account is adding a profile picture. This will allow others to quickly see who you are, making conversations between friends and family easier.

2) Add friends. You can search for people by their name or email. When you find someone that you want to add, you will have to send a friend invite. Once they have accepted your invitation, that person will be added to your Friends list. First will be Kasperek of course...
