

Design Thinking: Visualization

Task: Work in pairs (or individually). Design a simple mask for the evening dance party. Visualize the process – take pictures or sketch it. Then present your visualization to your colleagues. Following example may help you.

How to make a simple Ninja mask

Step One

What you need is a dark T-shirt

Step Two

Turn the T-shirt inside out if there is some writing or sign on it.

Step Three

Wear the T-shirt as shown, backwards, don't put your arms through. Have your face like a nun.

Step Four

Pull the sleeves behind your head.

Step Five

Tie the sleeves firmly.

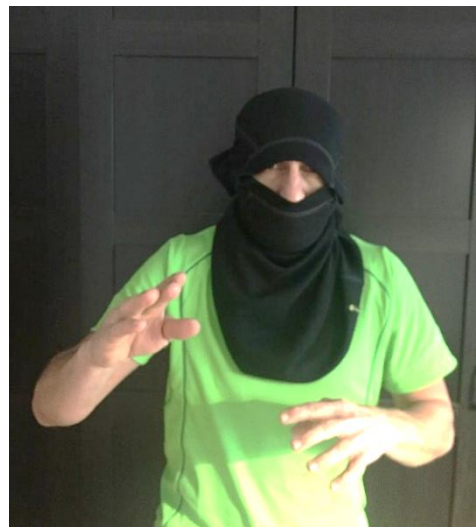

Step Six

Pull the top of your mask down to your brow.

Step Seven

Pull the bottom of your mask above your nose.

Step Eight

Done!

Now you can walk in a carnival procession or go to a dance party.
