

## **GROUP WORK**

**Form small groups (of 3-4 people each).**

### **A. Warm-up**

Do the crafts that Piotr is going to examine in his travels (antler furniture, crocheting/embroidering, beekeeping, ceramics) ring a bell for you? Do you have similar traditional crafts in your county? Discuss.

**B. Imagine that your group is to open a shop similar to Piotr's in your country. Your task is to design it from top to bottom. Prepare to present your idea for the shop to the other groups. Decide on the following:**

1. What regional/local goods the store would offer. Would it be selling food, souvenirs or both?
2. Plan the store's interior and place the products on the shelves (you can and should draw!) Would the place be large or small?
3. How would your group members contribute to the store? Why? Who would be doing Piotr's job (travelling to acquire more goods)? Who would be the salesperson? Who would be responsible for supply and logistics?
4. How would you advertise it to the tourists? Come up with a good slogan that the tourists from abroad would understand.

**C. Present your ideas to the other students. When one group is presenting, the other people's task is to come up with suggestions that could make that group's shop even better.**
